Who We Are...

One Company with Complete Solutions & Total Support...

Prime Tools and Equipments Pvt. Ltd. is the One Step Solution to your Productivity needs when it comes to precision bolting and on-site machining. Established in 2009, we are a leading multinational organization in consultative sales of torquing & tensioning systems, and on-site machining systems, through technological innovative products and unique customer support. We are also a leading on-site mechanical Services contractor providing controlled Bolting, Machining and re-tubing services.

With skilled human capital of over 150+ employees, we serve major industries including Oil & Gas, Power & Renewable Energy, Fertilizer, Cement, Automobile Manufacturing, Railways, Construction, Heavy Engineering, Steel, Mining, Shipping, Defence, to name a Few. We focus diligently on quality of deliverance through our Quality management system comprising of standard certifications like ISO 9001:2015.

TOOLS FOR EVERY INDUSTRIES...

Prime Torque Tools /Hydraulic Tools

A torque wrench is a tool used to control and apply a specific torque to a fastener such as a bolt or a nut. It is a fundamental element in general industrial maintenance & repair industries, to ensure customers' safety. Tensioning is a controlled way of applying clamping load to the bolt on applications within critical industries such as oil and gas, wind energy, construction and nuclear etc. This is done by stretching the bolt to the initial load.

SQUARE DRIVE TYPE HYDRAULIC TORQUE WRENCH

HEX TYPE HYDRAULIC TORQUE WRENCH

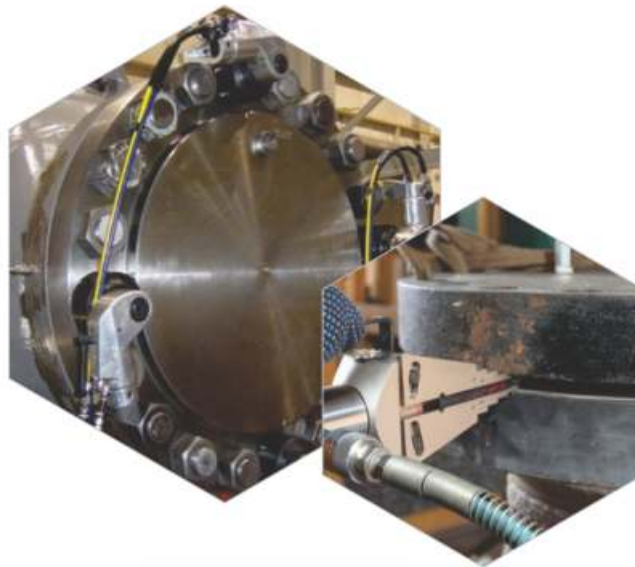

BOLT TENSIONER

HYDRAULIC JACKS (ALL TYPES)

HYDRAULIC NUT SPLITTER

HYDRAULIC FLANGE SPREADER

HYDRAULIC POWER PACK

HYDRAULIC HAND PUMP

HYDRAULIC BEARING PULLERS

Prime Electric, Pneumatic Tools & Battery Tools

A torque wrench is a tool used to control and apply a specific torque to a fastener such as a bolt or a nut.

LONG ANVIL PNEUMATIC IMPACT WRENCH

PNEUMATIC IMPACT WRENCH

PEWL SERIES ELECTRIC TORQUE WRENCH

Prime Industrial Hand Tools

Hand tools are simple tools which you use with your hands, and which are usually not powered also Hand tools is any tool that is powered by hand rather than a motor examples are chopping, chiselling, cutters, files, striking tools, struck or hammered tools.

PVR SERIES TORQUE MULTIPLIER

SPRING BALANCER

SLUGGING WRENCH

MANUAL TORQUE WRENCH

IMPACT SOCKET

CROW FOOT WRENCHES

INSERT SOCKET

UNIVERSAL SOCKET

PTM SERIES TORQUE MULTIPLIERS

Prime Tube Expander/Installation Tools

Tube Expanders are rolling tube type expansion tools used for fixing and molding tubes to tube sheets in the manufacturing processes of heat exchangers such as boilers and condensers. Proper tube installation is essential for efficient operation of condensers, boilers, and coolers. It involves securing and sealing the tubes to prevent leaks and ensure proper fluid flow.

Prime Tube Removal/Cleaning Tools

Tube cutters are commonly used in manufacturing applications to ensure the proper fit and function of tubing systems. Tube pullers are essential for safely and efficiently removing tubes from heat exchangers, boilers, and other equipment. Put simply, the cleaning process involves removing corrosion and mineral deposits. This is normally achieved using a Electric Tube Cleaning Machine with the Help of Brush and Other tools, or hydro Jet Tube Cleaning Machine.

BOILER TUBE CLEANING MACHINE

Prime Pipe Cutting & Flange Facing

Pipe cutting, or pipe profiling, is a mechanized industrial process that removes material from pipe or tube to create a desired profile. Typical profiles include straight cuts, mitres, saddles and midsection holes. Flange facing is an onsite machining service conducted on a flange to avoid leakages and corrosion. This service helps maintain the joint integrity required between two flange surfaces.
